

**ISABS Mumbai Chapter 'Umang Event'**  
**2<sup>nd</sup> July to 6<sup>th</sup> July 2008**  
**At: Dr. Mody's Resort, Karjat.**

**ABOUT ISABS**

Founded in 1972, Indian Society for Applied Behavioral Science (ISABS) is a national, voluntary professional body of behavioral scientists engaged in applying their knowledge and skill to the well being of persons, organizations & communities. Its members work as community change agents, independent consultants, trainers, counselors, academicians, and human resource development managers.

ISABS programmes focus on helping people to understand human processes better, and discover more creative and satisfying ways of relating and working.

ISABS utilizes group and experience-based learning as its main learning methodology. Experiencing, reflecting, hypothesizing, conceptualizing and experimenting, rather than lectures are the chief ingredients in this process of learning. ISABS also develops professionals, capable of facilitating such experience-based learning in organizational and societal contexts.

**HUMAN PROCESS LABORATORIES**

In a human process laboratory, a group of around 10-12 participants work together along with facilitator[s] to learn about human processes and discover more about themselves, their strengths & styles; interpersonal and group interactions; how they perceive others and are perceived by others. While this is the primary task, there is no pre-determined agenda and the group uses the 'here and now' experience to derive this learning, using one another as resources. The facilitator helps to create a climate for such learning.

**The language of conversation in a lab depends on the comfort and comprehension of the group members and it is likely that more than one language may be utilized during the lab. Expecting at diversity, Hindi would be the main working language.**
